## ABOUT ME

Passionate and self-driven Computer Science Engineering student at JNTUA, with a strong interest in web development and software engineering. Skilled in both frontend and backend technologies including React, Node.js, and Express.js, with hands-on experience building real-world projects. Constantly learning and evolving, I enjoy designing intuitive user interfaces and solving problems through code. Looking to grow as a developer and contribute meaningfully to real-world tech solutions.

## EDUCATION

2023 - 2027

JNTUA , AP

### Bachelor of Technology in Computer Science Engineering

Currently pursuing a degree focused on software development, data structures, algorithms, computer networks, and web technologies.

## PROJECTS

### Crickment – A CRUD-Based Blog Platform

A cricket-themed blog application that allows users to Create, Read, Update, and Delete posts. Designed with EJS and Node.js, this project demonstrates backend logic, route handling, and frontend rendering for dynamic data.

**TechStack Used :** Node.js, Express.js, EJS, JavaScript, HTML/CSS

### WhatsApp Clone with CRUD Functionality

Created a functional clone of WhatsApp where users can perform CRUD operations on messages. Emphasized real-time-like interactions and message management with a clean user interface

**TechStack Used :** Node.js, Express.js, JavaScript, HTML/CSS

### Wanderlust – Travel Place Discovery Website

A full-stack web application inspired by Airbnb that allows users to explore and search travel destinations based on location. The app features dynamic cards showing details like places, hotels, and descriptions. Users can perform CRUD operations.

**TechStack Used :** Node.js, Express.js, JavaScript, HTML/CSS

## SKILLS

- JavaScript
- MongoDB
- MySQL
- Express
- Linux
- Git/Github
- React
- Java
- NodeJs
- RestFul APIs

## LANGUAGES

- English
- Hindi
- Nepali
- Bhojpuri
- Maithali
